VANCOUVER HEIGHTS

a suburb of Vancouver. See listings under Vancouver.

VANCOUVER ISLAND

Vancouver Island is separated from the mainland of British Columbia by Queen Charlotte Sound, Johnstone Strait and the Straits of Georgia. Its extreme length is 285 miles, its greatest width 80 miles, and its area 16,400 square miles. A chain of mountains runs practically the whole length of the island, and is intersected by many fertile valleys. The coast line is indented with numerous deep bays and harbors. Coal mining, lumbering, farming, fishing, ship-building and whaling are the main industries. The principal towns are Victoria, Nanaimo, Ladysmith, Cumberland, Duncan and Alberni. The Esquimalt & Nanaimo Railway runs from Victoria to Alberni and Courtenay. Full information regarding the island can be obtained from the Vancouver Island Development League, Victoria.

Vancouver Rock, in the entrance of Milbank Sound.

VANDERHOOF

BRITISH COLUMBIA

Vanderhoof

a post office, is the logical centre of the Nechako Valley, the largest area of agricultural land in British Columbia, and also the geographical centre of the Province. The valley of the Nechako is from 20 to 40 miles in breadth, and extends from Prince George west to Fraser Lake. It contains millions of acres of good arable land, most of which is in an early stage of development. In the Vanderhoof district which was one of the earliest settled portions, there are a large number of fully developed and productive farms. Land in this fertile valley can be purchased cheaply today, but the steady demand is having an appreciable effect on prices which, in a few years, will be much in excess of values now obtaining. Pre-emption land is now scarce in the immediate vicinity of Vanderhoof, but can still be had from 6 to 12 miles back from the railway, which traverses the valley from east to west. A large number of soldier settlers have located in the Vanderhoof district. The amount of new acreage being brought in is steadily increasing, and the principal produce is grain, hay and vegetables of which an excellent quality is grown. Farmers are now turning their attention more to dairying for which the country is excellently adapted, and are gradually building up their herds. Vanderhoof is also a large shipper of prime beef.

The town of Vanderhoof, with a population of 350, is located on the south bank of the Nechako River and is distant from Prince Rupert 398 miles, and from Edmonton 557 miles. It is served by the G. T. P. Ry. (Can. Nat.) and is within the Fort George Provincial Electoral District. It is the outfitting and distributing point for the Omineca Goldfields, Stuart Lake, Fort St. James, Dog Creek, Chilco, Stuart River, Hulatt, Mapes, Lakes District, Greer Valley and Mud River Valley. The strategic position of the town assures it of a permanent position in the settlement of the valley. It has telegraph communication for points east and west on the G. T. P. and also by means of the Government Telegraph Service running from Ashcroft to Dawson, the two lines thus affording an excellent service. The latter service also maintains a telephone system in town, and phone communication with Fort Fraser, Endako, Burns

Lake, Fort St. James and Mapes. There are two churches, Presbyterian and R. C., while the Anglican church have monthly services. Educational requirements are taken care of by a large up to date school, costing \$25,000, also a high school, which is not yet in operation. Vanderhoof has a resident physician, a weekly paper, the Nechako Chronicle, and the Canadian Bank of Commerce and the Royal Bank of Canada maintain branches here. A moving picture house shows twice a week. There is a co-operative creamery, which turns out a high grade of butter which finds a ready market. There are two hotels, the Nechako and the Vanderhoof. These hotels are up to date and comfortable in every respect. Vanderhoof is also the headquarters of the interior sturgeon fishing industry. The Dominion Government maintain an illustration farm about 1 mile north of town.

Vanderhoof has the finest roads in the central interior and is the outfitting point for fishing and hunting expeditions. The rivers and lakes in the vicinity teem with fish, and big game hunting can be had in the close neighborhood. Climate is healthful and bracing and the altitude is 2200 feet. The scenery around Vanderhoof is superb, and the numerous lakes nearby afford bathing and boating facilities for visitors. Vanderhoof is the starting point for Stuart Lake, one of the beauty spots of the province.

VERNON - - - BRITISH COLUMBIA

Vernon

situated in the sunny Okanagan as the Valley is so often called from its beautiful climate, is year by year becoming more famous for its manufacturing possibilities, its mixed farming advantages and its splendid opportunities for truck gardening and apple growing.

The city occupies the site of the inevitable distributing centre of the Okanagan Valley, being virtually the terminus of the Okanagan rail line of the C. P. R., 46 miles south of Sicamous, on the main line, and connecting through Okanagan Landing, 4 miles south, with the Okanagan Lake points in Southern Okanagan and it is 382 miles east of Vancouver. The city occupies a site at the foot of a long low hill whose slopes are terraced with avenues and dotted with residences surrounded with shade trees, gardens and orchards, and enjoying a view of the north

Provincial Police, Gold Commissioner Agent Dominion Department of Indian Affairs, Customs Outport of Revelstoke and District Registrar of the Supreme and County Courts. The city enjoys all modern conveniences. Has Anglican, Presbyterian, Methodist, Baptist and Roman Catholic churches. The city owns the most modern electric light power station in the province. It enjoys the benefit of gravity water system piped from a mountain stream.

Close to Vernon lies the Coldstream Municipality, populated with successful fruit growers and containing within its bounds the celebrated Coldstream Estate, consisting of 13,000 acres with its large orchard of 800 acres.

Bordering on the town in another direction is the orchard and farm property of the Land & Agricultural Co. of Canada, containing 14,000

end of Okanagan Lake and the hills piled in majestic ranges.

The C.N.R. have finished all grading work ready for rails this year. This will give railway connection with the main line at Kamloops, and Lumby, which lies fifteen miles east. Kelowna, thirty-five miles south.

The population of the immediate locality is over 6,000 in number, it has been recruited largely from the great eastern centres and from the Old Country. The population of the city is about 4,500.

Vernon has the offices of Provincial Government Agent, Assistant Horticulturist, Provincial Agricultural Department Land Commissioner, Osoyoos Land Recording District,

acres, much of which has been divided into fruit and mixed farms.

The Vernon fruit Union have the largest fruit warehouse in B. C. situated here, the main building is 400 ft. long by 80 ft. wide with a frost-proof basement and first storey capable of storing 250 cars of apples. Last year they added an addition of 100 ft. by 10 ft. with a basement. There are four other packing warehouses also.

There are two cider plants and one by-products plant. These take care of all the small and cull apples. A new pickle industry has started up here, manufacturing the celebrated Red Cross brand of pickles.

The Vernon District offers great

attractions to the hunter and fisherman. There is an abundance of feathered game within easy access to Vernon. The more mountainous districts offer various species of large game, among which are deer, caribou, moose, mountain goat, bear and mountain lion. In both Kalamalka and Okanagan Lakes trout and other fish abound.

The head office of the Soldiers Settlement Board for the interior has been established here, where the interest of the returned soldiers is looked after.

Victoria

Victoria has the distinction of being the oldest community on the Northern Pacific Coast of this continent. Its history properly begins with the arrival of the steamship Beaver at Camosun Bay on the 13th of March, 1843, for the Hudson's Bay Co. had decided to move its principal station from Fort Vancouver on the Columbia to Vancouver Island on account of the difficulties arising out of the international boundary question. The expedition to establish the new headquarters was headed by Factor (later Sir James) Douglas.

After the settlement of the boundary dispute merchantmen and war vessels commenced to call at Victoria to replenish their stores. Here, too, came the miners of '49 on their way to and from the gold fields of California to make purchases in exchange for their gold dust, for the

ship service between the cities of B. C. and Puget Sound ports, and established a chain of palatial hotels from the east of Canada to the west. Until 1914, when the war broke out Victoria came more and more into prominence as a commercial and residential city, an ocean port and a tourist resort.

In every way it is a modern city. It owns its own waterworks system, that of Sooke Lake furnishing a supply sufficient for a population of 500,000.

Victoria has 47 miles of paved streets, 120 miles of sidewalks and 60 miles of boulevards. It owns its own sewerage system, which cost over \$2,000,000 to install. It has a population of 60,000. Its area is 4,637 acres, and the municipal assessment is \$56,694,922 on land, and \$26,196,630 on buildings.

PARLIAMENT BUILDINGS

Hudson's Bay Co. had a much better organized service than any to be found along the American sea coast.

It was after the appointment of Sir James Douglas to the post of governor of Vancouver Island that the political and legislative history of Victoria began. In 1858 gold was discovered on the Fraser and Thompson rivers. This period is marked by what is familiarly known as the Cariboo strike. At that time Victoria had a population of 5,000, and in 1862 the city was incorporated.

With the gold rush of 1898 to the Klondike, Victoria, in common with all of the cities on the Pacific seaboard from San Francisco to Prince Rupert, received a new trade impetus. About this time, too, tourist travel began to include Victoria in its itinerary, as the C. P. R. realizing the future possibilities of Vancouver Island, inaugurated a new steam-

Scores of the most modern offices and other business buildings have been erected; there are hundreds of beautiful homes; the entire downtown business district has been fitted with ornamental light standards; there is a very efficient street car service, operated by the B. C. Electric Railway Co., which also controls the domestic electric lighting and supplies power to factories. The ample supply of good water, the excellent system of sewerage, surface drains, street cleaning, garbage collecting and disposal is reflected in the citizens' general good health and low death rate.

During the war period Victoria contributed over 8,000 men for overseas service, \$400,000 to the patriotic fund, and \$650,000 to the Red Cross, as well as oversubscribing by 50 per cent to both of the Victory loans. She contributed largely to

the manufacture of munitions and war materials, among which latter must be mentioned the aeroplane spruce which came from timber districts adjacent to the city, and which assisted so largely in establishing British air supremacy.

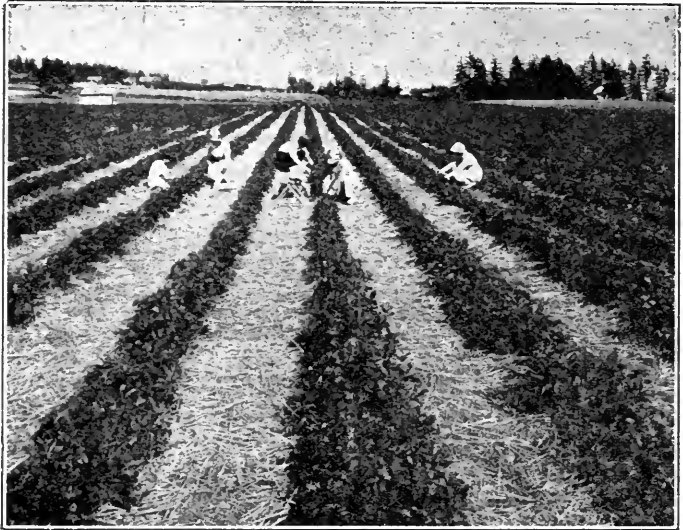

During the war and for the year following the cessation of hostilities shipbuilding was engaged in on a large scale. Three shipyards were in operation on the waters of the Inner Harbor, formerly the Songhees Reserve and now owned by the B. C. Government.

This tract of land is now utilized for industrial sites and railway terminals. C. N. R. Terminals have been established there, and the Sidney Roofing Co. have built an extensive manufacturing plant.

There is a large ship-repairing plant of Yarrows, Ltd., in Esquimalt harbor, and the Victoria Machinery Depot, as well as the local firm of

tivity. A branch of the Aerial League of Canada has been established here, and an aerial mail service is in operation between Victoria and Seattle.

One of Victoria's chief attractions and perhaps her best advertisement, from a climatic point of view is the Dominion Government Observatory, situated on Little Saanich Mountain. Victoria was chosen from all other cities in the Dominion of Canada as the one which possessed the best "seeing" atmosphere, free from fog, and the most equable climate. The observatory, which houses one of the two largest telescopes in the world, is reached by electric interurban or by motor. It is eight miles from the centre of the city, and a well-paved road winding through part of the beautiful Saanich Peninsula leads to the door. The observatory is open for visitors every day, and every Saturday evening, weather permit-

STRAWBERRY BEDS, COBBLE HILL

Hutcheson Bros., which manufacture metals, fittings and engines for ships.

On account of the fact that there are such large quantities of magnetic iron ore to be found on the island and in British Columbia, it is the hope and expectation of those interested in the manufacture of these ores to establish a steel plant in the vicinity of Victoria.

Efforts are also being made to encourage sheep raising on the Island, as this form of farming has been found to bring splendid returns. It is the object in this connection to establish a woolen mill here, and manufacture cloth and blankets as well as yarns.

Business operations interrupted by the war have been resumed. With the return of the men from overseas, normal conditions are becoming established; there is a demand for homes and farm lands, and great increase in all lines of commercial ac-

ting, they have the privilege of observing celestial objects through the great telescope.

The climate of Victoria has often been compared with that of the south of England, but recent statistics gave Victoria more hours of bright sunshine than even the far-famed summer resorts along the English Channel. From May to September is usually a period of small rainfall and bright skies, but the nights, even in midsummer, are invariably cool, and the heat of the day always tempered by the sea breezes. In describing the scenic beauties of Victoria and vicinity, it is difficult to find enough superlatives. Victoria itself has been called a "City of Trees." Airmen, looking down from aloft, tell us that Victoria has the appearance of a great garden. As the steamers reach this port, travellers are also impressed with this feature. Avenues of trees mark the city streets, and century-old oaks, wide-spreading

maples, and tall poplars grace every garden. From April to May the gold of the Scotch broom colors the hillsides, and all the year 'round, winter as well as summer, this is an ever-green city, for the laurel, the holly, the firs and the cedars do not change their color, and the grass only takes on a deeper tint. The scenic outlook from Victoria itself is unsurpassed. It is surrounded on three sides by the ever-changing tidal waters of the Pacific, and beyond them the green foothills and the towering snow-peaks of the Olympics.

On account of the equableness of the climate, there being no winter in the Eastern Canadian sense of the term, but only a rainy season, with light frosts and rare snowfalls, Victoria and the country surrounding are admirably adapted to all kinds of agriculture, to fruit growing, stock and poultry raising. There is an every-increasing demand from the

and Qualicum are to be found splendid golf links. There is a daily steamer service between Victoria and the islands of the gulf. This water trip is one of the most beautiful in Canada.

Victoria is the first and last port of call for all vessels to or from Southern British Columbia and Puget ports by way of the Straits of Juan de Fuca. Its great and increasing importance in relation to trade development on the Pacific, the Orient, and by way of the Panama Canal was recognized by the Dominion Government when they authorized the construction of the breakwater at Ogden Point. This has now been completed as well as two piers, freight sheds, electric crane and a car barge ferry slip at a cost of approximately \$3,000,000. When the ferry slip on the Songhee Reserve is finished cars can be loaded at the outer docks and sent by continuous journey to any

OBSERVATORY, SAANICH MOUNTAIN

prairie cities for berries and small fruits grown in the orchards around Victoria.

Sportsmen and tourists generally find in Victoria the mecca of all their desires. It has been called the gateway to Canada's auto paradise, and the Island Highway certainly leads one through scenes so marvellously varied and lovely as to be beyond description. The Island is rich in game and all of its lakes and streams contain trout of one kind or another, while the finest salmon on the North American continent is to be had at Campbell River.

The principal resorts reached by short trips by rail, auto or steamer, are Oak Bay, Brentwood, Sooke Harbor, Sidney, Shawnigan Lake, Duncan, Cowichan Bay, Cowichan Lake, Chemainus, Qualicum, Cameron Lake, Alberni, Great Central Lake and Campbell River. All of these can be reached within a day by automobile. At Oak Bay, at Brentwood, Colwood

railway terminal on the continent. At present the car ferry Canora connecting with the C. N. R. makes a daily trip from Patricia Bay to Port Mann linking up the Island with the mainland. The C. P. R. uses its Esquimalt car ferry slip for transferring cars from the Ogden Point ocean docks to its line.

The Government has started work on the new dry-dock at Esquimalt. Preliminary dredging has been under way for some months. The dock will be completed in two years' time, and will be large enough to handle the largest vessels afloat.

The fact that there are tremendous areas of marketable timber, and coal, iron, copper and other mineral deposits in great quantity on Vancouver Island has become known to the world. The Pacific Ocean will be the scene of great commercial development within the next decade. There will be a demand for every commodity that Vancouver Island can pro-

duce, especially in the line of timber and minerals. The awakening of the Orient means enormous Canadian trade expansion. Victoria is Canada's doorway on the Pacific Coast. This significant fact will not be overlooked. Already it is appreciated. The population of Victoria is growing rapidly. There is magnificent field here for the investor, the business man and the artisan.

A new automobile ferry service has just been inaugurated between the City of Victoria, via Sidney, and Anacortes, Washington. This will mean greatly increased facilities for handling the tourist traffic.

irrigation and domestic water plants. The citizens own their excellent local telephone system which connects with all long distance lines. It has Dominion Government and C. P. R. telegraph offices and express service. Has fine churches, high school and the first consolidated school in B. C. Area of municipality is about 28 square miles. It is one of the leading producers in Okanagan Valley of soft fruits, vegetables and especially apples. Ships more express tonnage than any other place in B. C. Has won medals and other prizes at Covent Garden and in United States in world competition for high class apples. Dominion experimental farm of excellent character adjoins the municipality on the south. Mixed farming can be carried on successfully, but the district is a specialized fruit growing district. Special courses are provided for newcomers to become expert in fruit-growing. Lumbering is carried on west of municipality.

Climate is excellent—dry, clear, sunny and mild—making this part of Okanagan Valley called the California of Canada, and very attractive for home-makers. Population of municipality, 2,500. Good fishing, shooting and motoring. See also Summerland.

WEST VANCOUVER MUNICIPALITY

located on the sunny side of English Bay, at the entrance to Burrard Inlet, West Vancouver municipal ferries furnish direct transportation to and from the City of Vancouver. Other modes of transportation are the P. G. E. R. from North Vancouver; also by auto North Shore Marine Drive. The present terminus of the Pacific Highway is at Caulfield, a summer residential site unequalled for its beautiful flowers. West Vancouver has provided for public schools. The Hollyburn school is capable of holding 160 children; the Dundarave school seating 80 pupils, modern in every respect. These are now being supplemented to accommodate the constantly increasing number of children. Marine Drive, the main artery of West Vancouver for road transportation, is built of asphaltic concrete and a favorite drive for motorists. Altamont Park is fitted to become a most popular and serviceable space. Telephone service operated by the B. C. Telephone Co.; water system, all that could be desired, free from contamination, alkali and lime, now being largely extended as the population is increasing at the rate of 50 per cent per annum. Sport and recreation: Fishing, both trolling and rod; tennis, bowling on the green, mountain climbing and boating. Industries at present: Lumbering, shingle mills and canneries. The municipality is most desirable for permanent homes and is the most popular summer resort around Greater Vancouver. The southern slope causes early vegetation. For further information write the Municipal Clerk for description and illustrated folder.

Municipal Officers.

Reeve—V. V. Vinson, Hollyburn.
Clerk—Jas. Ollason, Hollyburn.

R. G. DUN & Co.

Proprietors of

THE MERCANTILE AGENCY

This Company maintains some 225 offices throughout the world for the collection and dissemination of information regarding the financial and credit standing of merchants, manufacturers, traders, bankers, etc.

In British Columbia, offices are conducted at Vancouver and Victoria; other points in the province are visited regularly by representatives sent out by these offices.

At each office a vast amount of information regarding traders is available. In addition to these detailed reports, The Mercantile Agency publishes quarterly reference books containing the names of merchants, etc., with estimated financial and credit ratings, up-to-date lists of banks and bankers, good maps, and summaries of abstract of collection laws, etc., of each province.
